# Boca Chica (Dominican Republic), our operational hub in the Caribbean

Our Boca Chica base, strategically located next to the Port of Santo Domingo, is the **operational hub for SYM Naval’s dry-docking and ship repair services in the Caribbean.**

The shipyard features extensive workspaces and direct access to the sea, facilitating hauling-out maneuvers and ensuring high agility for vessel entry and departure.

Thanks to its open and versatile infrastructure, Boca Chica allows for the rapid and efficient planning of projects of various scales with in-house logistical support, establishing itself as **a key location for ship repair and maritime services in the Caribbean.**

**A shipyard with ample space, capacity, and direct access to the sea: the perfect combination for safe and efficient dry-docking operations.**

Dry-docking slipway  
for vessels up to

**130m**

LOA

**In-house equipment for welding, machining, electrical works, and piping.**

**Strategic location in the Caribbean for vessels transiting or operating in the region.**

Outfitting quay  
for vessels up to

**170m**

LOA

**Technical supervision and Class coordination.**

**Reduction of logistical costs and downtime by eliminating the need for additional vessel transfers.**

# Anchorage, afloat and port repairs

SYM Naval is a shipyard group specialized in shipbuilding and ship repair, with a primary focus on **dry-docking services, afloat repairs, vessel conversions, and rapid technical support throughout Latin America and the Caribbean.**

We provide mobile teams (Riding Squads) along with technicians and welders certified by Classification Societies, combining safe execution (HSE) with traceable quality control (QA/QC) to ensure reliable results and minimal downtime (off-hire).

## Afloat and port repairs

We perform comprehensive repairs without the need for dry-docking, both afloat in port and during transit. Our mobile teams (Riding Squads) operate at any point across the Caribbean or the Panama Canal, reducing vessel downtime.

## Anchorage assistance at the Panama Canal

This strategic presence allows us to guarantee immediate assistance in one of the world's most vital maritime corridors, ensuring the operational continuity of fleets connecting the Atlantic and Pacific Oceans.

## Emergency repairs

Available 24/7 for urgent interventions, our technical teams respond rapidly to unforeseen breakdowns in port or at anchorage.

## Preventive maintenance

We plan and execute maintenance programs tailored to the vessel type, its route, and operational condition. We evaluate structures, systems, and critical components, optimizing downtime cycles and extending the service life of the equipment.

## Structures, Steelwork, and Onboard Systems

A comprehensive service for structures, steelwork, and onboard systems, performing works in steel and aluminum, piping, mechanics, and electricity, along with surface preparation and certified coatings. All interventions are executed in accordance with Class specifications, guaranteeing safety, durability, and operational efficiency.

## Coordination with Classification Societies

We work under the supervision of the **leading Classification Societies** (DNV, ABS, LR, BV, RINA, NK).

We handle technical planning, QA/QC documentation, and Non-Destructive Testing (NDT), ensuring regulatory compliance and traceability in every intervention.

Over 25 years  
driving ship repair  
excellence

# Locations and Global Coverage

SYM Naval is a **shipbuilding and ship repair group** with a consolidated presence in the Caribbean, Latin America, and the Mediterranean.

With over 25 years of experience, we offer comprehensive solutions ranging from **dry-docking** and **shipbuilding** to **afloat** and **anchorage repairs**, as well as full hull and propulsion maintenance.

We operate from three strategic locations: **Boca Chica (Dominican Republic)** as a hub for ship repair and shipbuilding in the Caribbean; **Panama City** for regional support and anchorage assistance; and **Vilanova i la Geltrú (Spain)** as the base for engineering, innovation, and Mediterranean shipbuilding.

**An international network with European standards, dedicated to ship repair and maintenance in the Caribbean and the Mediterranean.**
