Ship Repair

Afloat Repairs / In-Navigation Repairs

Over 25 Years Driving Ship Repair Excellence

Locations & Global Coverage

SYM Naval is your strategic partner in ship repair, conversion, and maintenance. With over two decades of experience, we have strategic **locations in the Mediterranean** (Barcelona, Spain) **and in the Caribbean and Latin America** (Boca Chica, Dominican Republic, and Panama City, Panama).

We provide tailored solutions to meet each client's needs, ensuring speed, quality, and a sustainable approach.

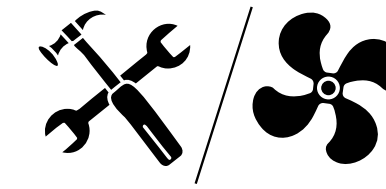

At SYM Naval, we have expanded our operations to offer comprehensive **global coverage**, addressing the needs of shipowners worldwide. With new strategic bases in key locations, we are better positioned to provide **fast and efficient solutions**, reducing downtime and maximizing vessel operational efficiency.

Global Coverage and Comprehensive Ship Repair Services

SYM Naval provides global coverage through our mobile teams (Riding Squads) and an international network of repair bases. We are prepared to deliver technical assistance anytime, anywhere.

We offer a full range of repair services designed to keep vessels operational with minimal disruption to their schedules.

Our expertise, infrastructure, and highly skilled technical team allow us to efficiently handle complex repairs, ensuring speed, precision, and a customized approach.

In-Navigation Repairs

Our teams board vessels to carry out repairs while in transit, minimizing schedule disruptions and reducing operational costs for shipowners.

- Immediate coverage in any sea or maritime route.
- Specialized services in electrical, mechanical, hydraulic systems, piping, and steel repairs.
- Minimizes impact on vessel operations.

Afloat Repairs in Port

With our own berths at our facilities, we perform fast and efficient repairs on vessels that do not require dry docking, optimizing downtime.

- Emergency repairs in port.
- Wet docking and pre-dry dock repairs.
- Complete services without the need for shipyard relocation.

In-Navigation Repairs

SYM Naval's Riding Squads service allows repairs to be conducted while the vessel remains operational, minimizing downtime and optimizing operating costs.

Global Coverage

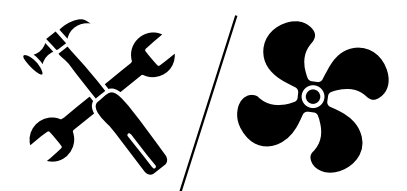

Our mobile teams can travel anywhere in the world to perform emergency repairs or onboard maintenance.

Areas of Expertise

- Diagnosis and repair of electrical and electronic systems.
- Hydraulic and piping repairs under operational conditions.
- Interventions in propulsion, machinery, and mechanical systems repairs.
- Steel repairs.

Advantages

- Cost reduction by avoiding itinerary deviations.
- Repairs without disrupting the vessel's commercial operations.

Afloat Repairs in Port

Flexibility and speed are essential in the maritime sector. SYM Naval specializes in afloat repairs, providing immediate solutions at our own berths or directly at the vessel's port of call.

Emergency Repairs

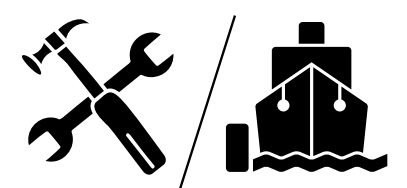

- Immediate solutions for critical failures requiring urgent attention.
- 24/7 availability, ensuring continuous vessel operation with minimal downtime.

Technical Stops

- **Planned maintenance** before or after dry docking.
- **Optimized downtime** with specific afloat repairs, avoiding unnecessary delays.

- **Specialized Infrastructure:** Fully equipped berths for all types of afloat repairs, with dedicated spaces for simultaneous operations.
- **24/7 Service**, ensuring the vessel's operability in the shortest time possible.

Ideal for large-scale work in electrical, mechanical, welding, piping, and painting systems.

Strategic Locations: Infrastructure & Capabilities

 **Barcelona, Spain
(Mediterranean)**

Our Vilanova i la Geltrú base features a private berth located within the port, specifically designed to facilitate technical stops for vessels. From this location, we perform afloat repairs, both emergency and planned, offering fast services tailored to shipowners' needs.

- Emergency repairs
- Afloat repairs that eliminate the need for full dry docking
- Direct coverage for operations in Europe and the Mediterranean
- Private berth for repairs up to 170 meters in length

 **Boca Chica, Dominican Republic
(Caribbean)**

This strategic Caribbean hub efficiently serves vessels operating in one of the busiest maritime regions in the world. With private docks in the port, we offer immediate availability for afloat repair services.

- Specialization in technical stops and emergencies
- Support for vessels transiting the Caribbean and the Americas
- Direct access to own specialized team for complex repairs
- Private dock for repairs up to 170 meters in length

 **Panama City, Panama
(Central America)**

From this strategic base, we support shipowners across Central and South America. Its proximity to the Panama Canal allows us to quickly respond to any technical request, ensuring continuous maritime operations in one of the world's most critical trade routes.

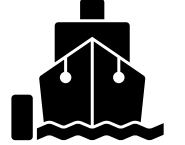

- Technical repairs and afloat assistance for the entire region
- Continuous support for vessels transiting the Panama Canal
- Coordination with own specialized team for a fast and efficient response

Key Factors for Excellent Repair Services

1 

Rapid and Localized Response

With bases in Europe, the Caribbean, and Central America, we can respond to emergencies and planned maintenance faster.

2 

High-Level Infrastructure

Private berths in Vilanova i la Geltrú and Boca Chica, designed to handle multiple vessel types.

3 

Extensive Coverage Network

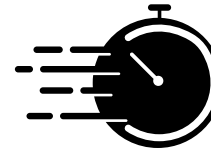

From Panama, we serve all of Latin America, reducing costs and response times compared to distant service hubs.

4 

Proximity to Key Routes

Strategic locations near the Mediterranean and Panama Canal, ensuring support in high-traffic maritime areas.

Speed and Efficiency: The Pillars of Our Service

1 

Rapid Response & Global Assistance

We understand that every minute counts in maritime operations, which is why we are committed to minimizing vessel downtime.

- **24/7, 365-Day Support**
Our technical team is available at all times to handle emergencies and operational needs.
- **Immediate Response**
From the first inquiry to execution, our processes are designed to deliver **fast and effective solutions**.
- **Riding Squads**
Mobile teams capable of **traveling anywhere in the world**, performing **repairs while the vessel remains operational**.
- **Optimized Technical Stops**
Our **Vilanova i la Geltrú and Boca Chica** bases are designed for **afloat repairs with minimal waiting times**.

2 

Specialized Technical Expertise

With over 25 years of experience, SYM Naval brings together a highly skilled team in all areas of ship repair. Each intervention is carried out by specialized professionals:

- **Electrical Systems**
Diagnosis and repair of complex electrical systems.
- **Mechanical Maintenance**
Repair and maintenance of critical mechanical systems to ensure continuous operability.
- **Welding & Steel Work**
Steel and aluminum repairs performed under international quality standards.

3 

Strategic Infrastructure

Our facilities in Vilanova i la Geltrú (Spain) and Boca Chica (Dominican Republic) are fully equipped for complex afloat repairs and technical stops:

- **Private berth**
Enabling repairs without the need to relocate the vessel to distant shipyards.
- **Coverage across Latin America and the Caribbean**
From our Panama base, we provide technical assistance throughout the region, ensuring rapid response to any port in Central and South America.

4

Personalization & Adaptation

We understand that each vessel and shipowner has unique needs. That's why we focus on customized solutions that maximize efficiency and minimize operational costs:

- **Detailed Pre-Analysis**
We evaluate the specific conditions of the vessel and port to plan the most efficient repairs.
- **Client Involvement**
We work closely with shipowners to ensure the final result meets their expectations.
- **Tailored Repair Plans**
Designing customized interventions adapted to timelines and budgets, guaranteeing maximum quality in every project.

5

Our Commitment to Sustainability

At SYM Naval, we strive to lead the transition toward a more sustainable maritime industry. Our environmental approach is backed by certifications and responsible practices:

- **ISO 14001 & ISO 45001 Certifications**
Ensuring that our operations are environmentally friendly and safe for our workers.
- **Environmental Impact Reduction**
Implementing solutions such as Ballast Water Treatment Systems (BWTS) and eco-efficient paints to reduce emissions and enhance vessel sustainability.
- **Material Consciousness**
We work with equipment and materials that meet the highest international standards, ensuring minimal impact on each project.

6

Constant Innovation

Our technical office is at the forefront of naval engineering, developing innovative solutions for the most complex challenges:

- **Advanced System Design**
Integrating cutting-edge technology for efficient vessel operations.
- **Optimized Dry Dock Times**
Using advanced methodologies to minimize docking periods, ensuring vessels return to service as quickly as possible.
- **Smart Repairs**
Implementing data-driven strategies to predict and prevent failures, reducing future costs for shipowners.

7

Reputation & Trust

With over 25 years of experience, SYM Naval is your trusted partner in ship repair:

- **200+ satisfied clients**
Our portfolio includes leading shipowners and operators who trust us to keep their fleets in optimal condition.
- **International Recognition**
SYM Naval is synonymous with quality, commitment, and tangible results in every project.
